## Bubbles:-

Acoustical properties of water are given by microbubble which are formed either by biological and organic loading type of mechanism of contamination and deposition of fragments in bubble outer surface . These microbubble occur more frequently in coastal water due to biological and organic loading more frequent

Microbubbles are common nucleus for cavitation of bubbles

Most important are the energetic processes that occur when a bubble bursts on the sea surface.

Bubble bursting is responsible for ejecting droplets into the atmosphere, creating the sea salt aerosol.

## Worthington Jet

The scattering of sound by an individual bubble is frequency-dependent with three primary regimes: close to, above, and

below the 'breathing frequency' of the bubble

The breathing frequency is inversely related to bubble radius

Optical=RAYLEIGHT AFFECT (SAME in BUBBLES)

Black transparent paper is called polarizer

Polarizer at 9 degree causes blue light in milk (example of atmos)

disappears due to RAYLEIGHT

AFFECT (also in noon evening colour of atmosphere effect)

Eyes not sensitive to ultraviolet rays

Sunsets are due to Rayleigh affect also

MIE SCATTERING makes clouds appera white in blue atmos

Scaterring of bubbles in equal direction at most practical

frequency(isotropic) but uneven at very low frequency may be at ( $<10\text{kHz}$ )

Scattering is largely a communal response of clouds rather than of individual bubbles

A pair of transmitting and receiving 'transducers' can measure backscatter

remotely along a profile. This technique has been used to infer the concentration and size of bubbles as a function of depth.

\*bubbles in the upper ocean can alter the optical properties (e.g. color and brightness) of the sea\*

Intuition depth and wind speed measurement If bubble may be as in studies

The injection rate of bubbles is expected to increase with the third or fourth power of the wind speed

On 14 sept 2022 at 9:42, I am  
writing this Memory when the  
maternal family and pawan

mama and sister friend Nimisha and nani came to celebrate my birthday and cake was delicious with the scent of chole bature tasty.

In the morning , I didn't got the chance to be called by my name in stage for birthday card (sorry interrupted by my sister call for making mess in hurry).Ok then at period 5 or 6 maybe(hindi period) I celebrated my birthday with people profoundly clapping at my birth and RidiHima(my preference-present)gave me a hand for birthday wish(not flirtingly) and distributed my toffee at class with the total toffee amount= Rs.120 (120units of kopico) . In this total amount of toffee , I brought back home 50 toffee to be exact and distributed the remaining 40 (approx)in class and other 30 by

distribution to my friends and some naughty boys .

(9:55p.m (time of writing this at night)My birthday day begins with the purchasing and sewing if my 40 size long white pants and new shoes of size 5 several days before birthday (Sunday) to be worn in this prestigious day.

Thats all I have to say about it and I am

depressed as my half yearly exam  
are coming in 20 sept and 16  
sept(computer).

From this day promise to become  
my passion of FORENSIC-SCIENTIST

Dream of never giving up shell  
sleedster shose goal is to be in the  
talblet kf wormhole handed in the  
hamds of the godsoeed . The  
goesspeed therows devices that  
cause akr resirstance to slow down  
the little sleedster but then it  
roattes and move down slowly and  
the goesleed said that this the end  
but the little replied that there is no  
end as he swings downs the aor  
rotating around like a falling  
feather but still he missed the  
tablet of portal of wormhole by a  
small scale of transport to the real  
world of him ie. In real life but the  
goespeed had diffrent thinking to  
trap the oottle speedster into the  
real wlrlld of him in his and then the  
part 2 of the episode of story end.

The little speedster caught. In the world of goespeed is actually a game world trapping.

In this world there is a book of emotions and everything else where the character has to learn through a character ie. In this dream by the little tortoise speedster.

In the opening of this dream , a scene plays where the character introduced himself that I am faster than you. The unknown minded consciousness of the little ran fastly but get caught by the goespeed . The foespeed in the intro says that You have jumped into the world wrong kid , I am faster than you

Actually the godspeed wants the little fellow to reside in his world as he thinks of him as a son.

Remember there is a enotion of books where emotions feeling senses to be in whatever like in romantic feels which pass these k sills to a specific charcater .

Your question should be who taught and give the goespeed this book of emotions and where did he got the

book of portalship and by whom.

Also the goespeed and his daufhter live in a FORTRESS of 'No difference ' with mystery , big and huge with the inscriptions of old titled people still reesiding in the fortress in souls .

The chracter of ours was given a task of finding

these souls and making them painted back.

Everyone in this world lived with a book or any other inscription of emotions passed down from one generation to the other .

There were big cities higher than the sites , big tornados ☐ and the "mountain of the PorPhora".

-----'

Also there was a dream of previous nights , that described the havoc of a tsunami of cosmos torjados and cyclones of the undergrounded people.

Where I and other people were victims of this and runned down the hell like a snake of resentment . Everthing was destoryed like the end of the world with the woods in people jands broken down

untouchably.

People fight for this last moment like to steal a chevrolet and I in the house of a rich character try to steal and use whereas the people of victims try to capture the most expensive thing on the planet owned by the world  
After this arrangement , I runned with my luxury

car with family to gather at the safest place where water and tornadoes just don't hit. In the way of travelling, There were numerous obstacles in the way of driving ahead.

You could listen to a radio on the Moon but it's virtually impossible aboard a submarine. Radio waves travel much more easily through space than through water.

showing this motivation on the top

Fill bulb with helium to float in air  
or bioluminescence bacterium to  
spread light over

If your actions inspire others to  
dream more, learn more, do more  
and become more, you are a  
leader.

Light way is when people go to  
buy light in store, I went to the  
other side to buy true light.

"How small can you distinguish  
between black and white" i.e. like  
really small microscopic particles.

Dark literature - deeper art is.

Art that showed way ie art i. Which light by car headlight showed the train railing although it is destined the other headlight bumps onto the pittied and ditched road which ofcourse is not destined for both the top and bottom things unlike the other headlight which showed the

train railing which are accurately destined for both the top and bottom but sometimes even destiny destined isn't.

Dream (best sci fi ) ever on 26 oct 2022

Choosne ones are destined or travelled feom other era of clamous or some to the modern era wjere robots are transformed to the modern robot with soirtis ie fires emotions and controlls by humans .

The story of choosen ones are (spoiler not are first borns ) from different era like some aee from

clamorous era in which people wear chain and the fifth was chief minister like post of that era (and their armies people wear chain like armour )transformed to a house of a person which has a friend robot like . Which develops a 5 controlled gammeciella (a serpent like robot) which travelled in the horizons or above the

realities era historic era and many more . Then when they go to some place with this gammeciella their fate met another 9 controlled robot which has its eyes on the gammeciella and he tries to attack them and demand their robot but before he(spoiler in this verse he she it are mixed ) could chase them they traveled with their light speed 5 controlled gammeciella with each gamme having light speed and this speed subsequently adding to the other gamme and so on . The bad guy 9 controlled robot like serpent has 9000 light years speed while our gammeciella also have great speed but each gamme only have 30 or 25 light years speed.

The 5 are teleported from various eras to a house (mentioned earlier) but this house is in built in a

straight line structure like cavern  
house of stone and stonehedges.

Prologue:

The 1 was with other people and  
friends in a halloween like place  
with ceiling of jail like and then  
they were enjoying clamora (a  
ritual form clamorous period ) and  
then they discovered

something wemping(looking miserable) in the ceiling was a robot which has no fire , they named it utron and then they helped him to motivate and get fire in his eyes for a particular reason and then he transformed into ultron.

Also there was fight between (i dont know or cant remember) but in this fight you can just wave your hands like wings and option comes that says to fly with the parter with you(like pokemon games)

A kdrama in which heroin goes to the advert board where music plays of special type and to feel it every year . She is interrupted by a friend who asks why she is here in the roads market

instead of expensive stalls , she replies wholeheartedly by saying that seeing a billboard , but not seeing it , actually hearing the pleasant dropout music from it is like having meet a prime minister ie she is saying that her connection is very precious unlike the ordinary people who would say its just a sound and bypass away from highway.

ie.: She is listening and has concrete attachment to that particular music playing there and goes there every occasion or year . The fate has reconciled her with a soulmate ie hero who was buying vegetables at the market and saw a girl in the top of something standing like house roof to listen to the music and dancing .

Why this music is only particularly sound amazing to that girl , could there be more , a kind of illness , a boon boom

Rivers between lights ie reflection  
by opaque object ie things which  
looked like a river but small but  
when sunlight passes through it , it  
perceives as a river . In reality  
there was once a river , but had  
been dried up , Now what's left up  
is that of the unborn child birthed  
to light (indicates river like opaque  
small object (may be speleological  
related )

Toes of mountains or slippers of mountain ,  
To walk across the ocean , but had been stuck in the sandals of god , this slippers can be perceived as the outer and inner parts of sitting in toilet while seeing the garments through (the garments here are slopes of mountains like chadda , when you see through it or place your

perceiveness between both the inner and middle part (not outer but outer partially) You see the toes covered with slopes on outer but on inner perceive of (instep and arch) you see a river (mentioned above). Also this place can be seen as or is cave. ALSO IN This river (earlier) lies a underneath sun or reflection of that outer sun for awhile and the fish in it move like birds in the sky in the perception of that still sun seeing those birds gazing over it like head turning its fingers .
